EXPERIENCE

Cloud Trains Technology | Apr 2025 – July 2025
Full Stack Development Intern (Full-Time)

1. Astro Janak *(Full Stack Project)*
 - Built a full-stack astrology platform with dynamic Kundali generation and Hindi/English PDF reports.
 - Integrated Divine API, Razorpay, and Puppeteer for real-time data, payments, and 80+ page PDFs.
 - Created admin panel to view Kundalis, manage leads, edit contact info, and export Excel reports.
 - Enabled personalized PDF downloads with user-specific birth details and location input.
 - Designed a modern, responsive UI using React.js, Tailwind CSS, Axios, and clean UX patterns.
 - Developed backend using Node.js, Express.js, MySQL, and secure RESTful API architecture.
2. Frontend Contributions (3 Projects)
 - Launchpad MVP – Designed the full home page using React and Tailwind CSS.
 - Xaun – Built Speaking & Consulting page and key sections of the home page.
 - EIEL – Developed selected home page sections using HTML, CSS, JavaScript.

SKILLS

HTML5	Tailwind CSS	MongoDB	Node.js
CSS3	JavaScript	Express.js	Redux
Bootstrap	TypeScript	React.js	Git & GitHub

EDUCATION

Bachelor of Computer Applications (BCA) ~ 2024
Tecnia Institute of Advanced Studies ▪ Delhi

Certifications:

- MERN Stack Certification – Apna College
- HTML5, CSS3, JavaScript Certification – Infosys

PROJECTS

Restify

Proficient in utilizing technologies including HTML, CSS, JavaScript, Bootstrap, EJS, Mongoose, Express.js, Node.js, and RESTful API. Designed and developed a responsive platform inspired by Airbnb for listing hotels and restaurants, following the MVC architecture.

- Oversaw the management of listings by admins and enabled users to view details, send feedback, and explore locations.
- Implemented features such as login, signup, authentication, and robust client-side and server-side validations to enhance user experience.

Contactify

A feature-rich contact management application developed with the MERN stack and MVC architecture. Technologies: MERN Stack, Bootstrap, Axios, JWT, bcrypt, RESTful APIs, React-toaster.

- Authentication & Security: Implemented secure login/signup with JWT and bcrypt, ensuring protected routing and password encryption.
- RESTful APIs: Designed and integrated APIs for efficient client-server communication.
- Responsive Design: Optimized for cross-device compatibility using Bootstrap and custom CSS.
- State Management: Leveraged local-storage and react-toaster for persistent data and real-time notifications.
- Database Operations: Managed CRUD functionality with Mongoose.

ACHIEVEMENTS

- Participated in the ATC camp as part of NCC, gaining leadership and team-building experience.
- Awarded for academic excellence during school, recognized as a top performer.
